BUILT FOR GROWTH

A PROVEN TEAM DRIVEN BY VALUE AND COMMITTED TO EXCELLENCE

TSX: TI

AUGUST 2021
Forward-Looking Information:
This presentation contains “forward-looking information” within the meaning of Canadian securities laws. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "targets", "expects", "is expected", "unique investment opportunity", "is positioned" or "assumes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would" or "will" occur or be achieved. In addition, any statements that refer to expectations, predictions, indications, projections or other characterizations of future events or circumstances contain forward-looking information. Statements containing forward-looking information are not historical facts, but instead represent management’s expectations, estimates and projections regarding future events.

Forward-looking information includes, among other things, statements relating to: estimated C1 cash costs and AISC; future financial or operating performance and condition of the Company, including its ability to continue as a going concern, and its business, operations and properties; the Company’s ability to implement its growth strategy to maximize the value of its property holdings; the Company’s planned exploration and development activities at Empire State Mine; costs, timing and results of future exploration and drilling; forecasted trends in the global zinc market, including in respect of the price of zinc; capital and operating cost estimates; economic analyses (including cash flow projections) from the Technical Report; the adequacy of the Company’s financial resources; the estimation of mineral resources; the realization of mineral resource estimates; the probability of inferred mineral resources being converted into measured or indicated mineral resources; the production schedule for the Empire State Mines ("ESM") #4 mine; production estimates for ESM #4 mine; the Company’s plans for marketing of zinc concentrate produced at the Empire State Mine and mill; any updates to the mine plan for ESM #4 mine and continuation of the drill program at the Empire State Mine; timing, receipt and maintenance of approvals, consents and permits under applicable legislation; the Company’s ability to re-negotiate expired leases and the timing thereof; environmental, permitting, legal, taxation, title, socio-economic, community relations or political issues that may adversely affect the Company’s current and anticipated operations; the Company’s expectations with respect to the payment of dividends; the Company’s ability to make scheduled payments of the principal, or to pay interest on or refinance its indebtedness; the Company’s expectations with respect to principal shareholders; and the Company’s expectation that it will be able to continue to locate and retain employees and consultants with required skills and knowledge.

Forward-looking information is based on opinions, assumptions and estimates made by the Company in light of its experience and perception of historical trends, current conditions and expected future developments, as well as other factors that the Company believes are appropriate and reasonable in the circumstances, as of the date of this presentation, including, without limitation, assumptions about: equity and debt capital markets; the ability to raise any necessary additional capital on reasonable terms; future prices of zinc, gold and other metals; the timing and results of exploration and drilling programs; the likelihood of discovering new mineral resources in the Balmat-Edwards district; the accuracy in the Technical Report of the mine production schedule; the estimated time of completion of drift rehabilitation and refurbishment of ESM #4 mine; the production estimates; the geology and geophysical data of ESM; the metallurgical forecast; the economic analysis, capital and operating cost estimates; the accuracy of any mineral resource estimates; the successful integration of ESM into the Company’s business; availability of labour; the accuracy of drill sample results at ESM; future currency exchange rates and interest rates; operating conditions being favourable; political and regulatory stability; the receipt of governmental and third party approvals, licenses and permits on favourable terms; obtaining required renewals for existing approvals, licenses and permits and obtaining all other required approvals, licenses and permits on favourable terms; sustained labour stability; stability in financial and capital goods markets; availability of equipment and the condition of existing equipment being as described in the Technical Report; the absence of any long-term liabilities created by the mining activity in the Balmat region beyond those described in the Technical Report; the accuracy of the Company’s accounting estimates and judgments; the impact of adoption of new accounting policies; the Company’s ability to satisfy the terms and conditions of its indebtedness; and the timing of a revised mine plan for ESM. There can be no assurance that such estimates and assumptions will prove to be correct. In addition, if any of the assumptions or estimates made by management prove to be incorrect, actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking information contained in this presentation. Accordingly, readers of this presentation are cautioned not to place undue reliance on such information.

Forward-looking information is necessarily based on a number of the opinions, assumptions and estimates that, while considered reasonable by the Company as of the date such statements are made, are subject to known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information, including but not limited to the following factors described in greater detail under the heading “Risks Factors” in the Company’s most recent Annual Information Form available at www.sedar.com: limited operating history; dependence on ESM; refurbishment of the mine and mill; inherent risks of mining; estimates of mineral resources; production decisions based on mineral resources; uncertainty in relation to inferred mineral resources; fluctuations in demand for, and prices of, zinc; production projections and cost estimates for ESM #4 mine may prove to be inaccurate; future requirements for additional capital; profitability of the Company; ability to attract and retain qualified management; title; competition; governmental regulations; market events and general economic conditions; environmental laws and regulations; threat of legal proceedings; rights, concessions and permits; social and environmental activism; land reclamation requirements; Tailings Management Facility and environmental reclamation; insurance; undisclosed liabilities; health and safety; dependence on information technology systems; zinc hedging activities; conflicts of interest; risks inherent in the Company’s indebtedness; risks inherent in acquisitions; integration of the mine assets; labour and employment retention/relations; anti-corruption and bribery regulation, including ESTMA reporting; infrastructure; enforceability of judgments; absence of a market for the common shares; fluctuations in price of the common shares; loss of entire investment; significant ownership by Richard W. Warke; future sales of common shares by Richard W. Warke and other directors and officers of the Company; use of proceeds; payment of dividends; currency exchange rate risks; pro forma financial information; public company status; financial reporting and other public company requirements; dilution; and securities analysts’ research or reports could impact the price of the common shares. These factors and assumptions are not intended to represent a complete list of the factors and assumptions that could affect the Company. These factors and assumptions, however, should be considered carefully. Currency is in US dollars and tonnage is in short tons unless otherwise indicated. Other than as required by securities laws, Titan assumes no responsibility for updating the forward-looking information in this presentation.

Scientific and Technical Information:
The scientific and technical information in this presentation has been approved by Mr. Scott Burkett. Mr. Burkett, Vice President of Exploration for Titan, is a qualified person as defined by National Instrument 43-101 (NI 43-101). Mr. Burkett has over 12 years of mineral exploration experience and is a Registered Member through the SME (registered member # 4229765).
Overview

• Focus on exploration and development; driven by best-in-class leadership

• Empire State Mine (ESM), NY State
  • 100%-owned zinc producer in historic mining district
  • H2/21 production forecasted at 26M payable lbs at AISC¹ of US$0.88/lb
  • In the process of developing three near-mine open-pit resources

• H2/21 strategy to retire portion of debt and initiate inaugural dividend

• Part of the Augusta Group – strong track record in exploration and development

¹. AISC is a non-GAAP measure. See the Company’s most recent MD&A for discussion of non-GAAP measures.
Our Strategy

Mission: To deliver extraordinary shareholder value through exploration, development and operational excellence

**BEST-IN-CLASS LEADERSHIP**
- Leverage experienced management and directors
- Remain aligned with shareholders – management/directors own 58% of Titan shares
- Attract and retain top talent

**OPERATIONAL EXCELLENCE**
- Deliver on expectations
- Innovate to capture efficiencies and lower costs
- Operate to high health, safety and environmental standards
- Invest in our workforce and support skill development for advancement and growth

**PRUDENT GROWTH**
- Maximize NAV per share through risk-adjusted returns
- Advance pipeline of low-risk, high-return organic projects
- Realize external opportunities to enhance our North American portfolio
- Maintain a conservative capital structure

**SUSTAINABLE DEVELOPMENT**
- Build relationships based on respect, trust and transparency
- Mitigate the impacts of our actions to ensure safety and environmental well-being
- Jointly create long-term positive legacies with our host communities

Leaders in building long-term value
Empire State Mine:
Focused on Exploration in a 100-Year-Old Zinc District

- Producing zinc concentrate
- Local employer, benefiting St. Lawrence County in northern New York
- Long-term zinc concentrate offtake agreement with Glencore – transportation within North America
  - 50% of H2/21 forecasted zinc production fixed at US$1.35/lb
- Historic production – 44M tons milled at average grade of 9.4% zinc from 7 mines within 30-mile radius of mill

Shipment of zinc concentrate leaving site
Empire State Mine: H2/21 Production and Cost Guidance

- H2/21 production forecasted at 26M payable lbs at AISC of US$0.88/lb
- Steady and marked improvement in both safety and production
- Strategy to retire debt obligations and fund an inaugural dividend
  - Considering several initiatives with potential to increase short term mill throughput while maintaining or reducing costs

</table>

1. C1 cash cost per payable pound sold is a non-GAAP measure. All-in sustaining cost per payable pound sold ("AISC") is calculated as C1 cash cost plus sustaining capital to maintain the mine and mill per pound sold. All-In Sustaining Cost per pound of zinc payable produced does not include depreciation, depletion, and amortization, reclamation and exploration expenses. See the Company’s most recent MD&A for discussion of non-GAAP measures.
Empire State Mine: Improving Performance and Trajectory

Empire State Mine: Near-Mine and District Exploration

• Production supported by current mineral resources with potential for near-mine resource additions
  • Current source is ESM #4 mine – multiple zones in production; Mahler, New Fold and Mud Pond
  • Mining has recommenced on the #2D zone
  • Surface drilling has discovered Little York, new high-grade zinc mineralization zone between Mud Pond and the historically mined Upper Fowler zone
  • Future discovery potential through additional near-mine exploration
• Targeting large, high-grade deposits (15 to 30+ Mt at 10% zinc) – new ideas and modern approach to exploration led by award-winning team

Office building and 3,800 tpd shaft

5,000 tpd processing plant

Underground crusher at 3,100 level

Fully equipped maintenance shop capable of servicing all equipment
**Empire State Mine:**
**Potential Near-Term Incremental Mill Feed**

**Hoist House, Pumphouse and Turnpike**
- Shallow zones of near-mine open-pit mineralization discovered in Nov 2019
- Potential to add low-cost production
- Strategic zones to achieve Company’s strategy of providing feed to ESM mill with over 3,000 tpd of excess capacity in an effort to dramatically increase production and lower costs
- Future discovery potential through additional near-mine exploration
- 20,000 ton bulk sample to be mined and processed in Q3 2021
- Production anticipated in 2021

![Hoist House Zone at ESM, Looking Northeast](image)
Empire State Mine: Excellence in Exploration

**Underground Drilling**

- Utilizing Company-owned and operated underground drills (<$20/ft)
- Delineation of additional mineralization in Mahler, Mud Pond and New Fold
- Data used to refine current mine plan in preparation for development in 2021 and beyond
  - **Mahler**
  - **Mud Pond**
  - **New Fold**
  - **#2D**

Empire State Mine: Resource Expansion Potential at #4 and #2D

- #4 mine – mineralized zones generally plunge to northeast; potential to extend zones up and down-plunge
- #2D zone – More than 2,000ft of strike length and open down-plunge and laterally; connected by historic infrastructure on 2500 level to the #4 shaft
Empire State Mine: District Exploration – H2/21 Plan

**H2 2021**

- **Surface Targets:** Little York, Pierrepont, Outlet
  - Little York new discovery—(11ft @ 18% Zn¹)
- **District Targets:**
  - Nickerson Rd – marbles with Zn occurrence
  - Side Pocket – Upper marble stratigraphy along Balmat-Edwards trend
  - Island Branch – Lower Marble with magnetic low suggesting large synform structure like Balmat
- Multiple untested geophysical targets

The Augusta Group – Track Record in Exploration and Development

Current Augusta Company Returns

- **SOLARIS RESOURCES**
  - TSX: SLS; OTCQB: SLSF
  - $1.4B Market Cap
  - (308% FY 2020 return)

- **TITAN**
  - TSX: T
  - $39M Market Cap
  - (171% FY 2020 return)

- **augusta GOLD CORP.**
  - TSX: G; OTCQB: AUGG
  - $112M Market Cap
  - (170% FY 2020 return)

Past Augusta Company Returns

- **VENTANA GOLD CORP.**
  - Sold for $1.63 in 2011
  - (12,960% return)

- **AUGUSTA RESOURCE CORPORATION**
  - sold for $667M in 2014
  - (3,300% return)

- **ARIZONA MINING**
  - Sold for $2.1B in 2018
  - (6,100% return)

- **EQUINOX GOLD**
  - Co-Founded in 2017; $2.3B Market Cap
  - (1,300% return)

Note: Market cap data as at August 10, 2021. The results for Ventana Gold Corp., Augusta Resource Corp., Equinox Gold, and Arizona Mining Inc. are independent of the results of Titan Mining Corp. and are no guarantee of the future performance. Undue reliance should not be placed thereon when considering an investment in Titan Mining Corp.
Investment Highlights

**Best-in-Class Leadership**
- **Demonstrated track record in exploration and development.** Executive Chair, Richard Warke, and the Augusta Group have generated extraordinary shareholder value.
- **Award-winning.** CEO Donald Taylor is the recipient of PDAC’s 2018 Thayer Lindsley Award for the 2014 discovery of the world-class Taylor lead-zinc-silver deposit in Arizona.
- **Strong board.** Experienced, well-rounded and widely-recognized directors.

**Leverage to Zinc Price**
- **Exposure to Increasing Zinc Prices.** Located in prolific mining district.
- **Significant Discovery Potential.** Targeting new discoveries in the 15-30Mt range at ESM, grading 10% zinc.

**Focus on Optimizing Cash Flow**
- **ESM mine plan** includes higher-grade New Fold zone in ESM #4 mine and #2D zone as well as recent results from Turnpike and Hoist House zones.
- **Focus on development and exploration.** Infill drilling at #4 mine, drilling of near-mine open-pit mineralization as well as district exploration.
History of Exploration Success: Potential for Additional Discoveries

Many discoveries made during a century of mining operations

- Minimal exploration during 2000-2010 period
- District remains highly prospective – refocus on exploration concurrent with production

Long Production History with Numerous Discoveries

Notes: Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. There is no certainty that any part of the Mineral Resources estimated will be converted into a Mineral Reserves estimate. Resources stated as in-situ grade at a Zinc price of $1.07/lb, with an assumed zinc recovery of 96.3% Resources are reported using a 5.3% Zinc cut-off grade, based on actual break-even mining, processing, and G&A costs from the ESM operation. Numbers in the table have been rounded to reflect the accuracy or the estimate and may not sum due to rounding. Source: SRK 2020.

</table>

Note: Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. There is no certainty that any part of the Mineral Resources estimated will be converted into a Mineral Reserves estimate. Resources stated as internal to an optimized pit shell, above a cut-off grade of 1.57% Zn. Cut-off is based on break-even economics at a Zinc price of $1.07/lb, with an assumed zinc recovery of 94%, and actual processing, and G&A costs from the ESM operation. No mining costs were considered in the calculation of this COG, as the pit optimization incorporates the mining costs to develop the shape for reporting. Numbers in the table have been rounded to reflect the accuracy or the estimate and may not sum due to rounding. Source: SRK 2020.
Our Approach to Sustainability

Guiding Approach

• Our employees are governed by a commitment to integrity, trust, community involvement as well as environment and social stewardship
• Our projects are developed with the goal of delivering long-term mutual economic benefits for employees, communities, local governments and shareholders
• We strive to minimize the environmental, social and safety impacts of our activities through innovation and the use of technology
• A key measure of a successful project is defined by direct engagement and transparent discussions by our company with the surrounding communities which we impact

INTEGRITY AND TRUST

• We listen, communicate and respond to community stakeholders in an open, respectful and timely manner
• We build and reinforce our relationships through transparency
• We back up our commitments with action
• We comply with both the letter and spirit of laws, regulations and permits

COMMUNITY INVOLVEMENT

• We promote local economic development by hiring and buying locally
• We partner and invest in workforce training – so workers have the skills for future advancement and growth
• We use our projects as a catalyst to expand economic development and community investment for the benefit of local residents, community organizations and local governments

ENvironmental AND SOCIAL STEWARDSHIP

• We mitigate the impacts of our actions to ensure the safety and environmental, well-being of the areas in which we operate
• We work jointly with communities to create positive, long-term legacies that benefit future generations
• We carefully manage the natural resources of our projects, and minimize our environmental footprint through sound business decisions

Committed to localization and building partnerships that deliver long-term mutual benefits
